

## OROFLEX 20 SUPPLY LINE

*Our Proven Turn-Key System is designed to eliminate leaks, and keep containment when transferring produced water. This system also Reduces waste and the Expenses of lost water during Fresh Water Transfers. Our Premium and Flexible Nitrile Pipeline is compatible with Brine water, sand, most chemicals, oil based fuels and is also resistant to both UV and abrasion.*

**1 mile of OROFLEX 20 can be deployed in UNDER 30 MINUTES and requires only 8 couplings per mile.**

### **Compatible with Air Use to pig the entire line**

- Custom Continuous lengths from 3' -660'
- Operating Temperature range -40°F to +170°F
- Low Friction Loss
- Working Pressure up to 200 PSI
- Diameters 2", 3", 4", 6", 8", 10", 12"
- Over 90 miles successfully operating in Canada and 6 states
- Full Line of custom Deployment and Retrieval Equipment available
- Transport 660' continuous length hose in standard 1 ton pickup
